AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application. Please amend the claims as indicated below.

1. (Currently amended) A nestable shopping cart formed to at least partially receive a second nestable shopping cart, the nestable shopping cart comprising:
 - a frame;
 - a plurality of wheels coupled to the frame;
 - a basket coupled to the frame; and
 - a body coupled to the frame, the body comprising an integral seat portion and back portion, the back portion defining a nest space for receiving;
~~a seat coupled to the body to at least partially define a seat portion and a nest space, the nest space positioned to receive~~ at least a portion of the second nestable shopping cart.
2. (Original) The nestable shopping cart of claim 1, wherein the frame is at least partially formed with metallic tube members.
3. (Original) The nestable shopping cart of claim 1, wherein the body is formed from a plastic material such that the body covers at least a portion of the basket.
4. (Canceled)
5. (Original) The nestable shopping cart of claim 4, wherein the body and the seat are integrally formed as a single piece using a rotomolding process and a plastic material.
6. (Original) The nestable shopping cart of claim 1, wherein the body and the seat define a plurality of substantially solid surfaces.

7. (Original) The nestable shopping cart of claim 1, wherein the nest space receives at least a portion of a basket of the second nestable shopping cart.
8. (Original) The nestable shopping cart of claim 1, further comprising a second basket, the first and second basket arranged such that at least a portion of one of the baskets is above the other of the baskets.
9. (Original) The nestable shopping cart of claim 1, wherein the nest space receives at least a portion of a first basket and a second basket of the second nestable shopping cart.
10. (Currently amended) A nestable shopping cart formed to at least partially receive a second nestable shopping cart, the nestable shopping cart comprising:
a frame;
a plurality of wheels coupled to the frame;
a first basket coupled to and extending from the frame;
a second basket coupled to and extending from the frame and disposed substantially above the first basket, the first basket extending from the frame a greater distance than the second basket;
a body coupled to the frame, the body covering at least a portion of at least one of the first basket and the second basket; and
[[a]] an integral seat and back portion coupled to the body to at least partially define a cart passenger seat and a nest space, the nest space adapted to receive at least a portion of the second cart.
11. (Original) The nestable shopping cart of claim 10, wherein the frame is at least partially formed with metallic tube members.
12. (Original) The nestable shopping cart of claim 10, wherein the body is formed from a plastic material to define at least one substantially solid surface.

13. (Canceled)

14. (Original) The nestable shopping cart of claim 13, wherein the body and the seat are integrally formed as a single piece using a rotomolding process and a plastic material.

15. (Original) The nestable shopping cart of claim 10, wherein the nest space receives at least a portion of a basket of the second nestable shopping cart.

16. (Original) The nestable shopping cart of claim 10, wherein the nest space receives at least a portion of a first basket and a second basket of the second nestable shopping cart.

17. (Original) The nestable shopping cart of claim 10, wherein the body and the seat portion cooperate to substantially enclose the cart passenger seat.

18. (Currently amended) A nestable shopping cart arranged to receive at least a portion of a second nestable shopping cart, the nestable shopping cart comprising:

a frame;

a plurality of wheels coupled to the frame;

a first basket coupled to the frame;

a second basket coupled to the frame and disposed substantially above the first basket;

a plastic body coupled to the frame, the plastic body covering at least a portion of at least one of the first basket and the second basket;

a seat portion integrally formed as part of the plastic body to at least partially define a cart passenger seat and a nest space, wherein

the nest space is adapted to receive at least a portion of the second nestable shopping cart, and

the cart passenger seat faces the second basket.

19. (Original) The nestable shopping cart of claim 18, wherein the body and the seat are integrally formed as a single piece using a rotomolding process and a plastic material.
20. (Original) The nestable shopping cart of claim 18, wherein the nest space receives at least a portion of a basket of the second nestable shopping cart.
21. (Original) The nestable shopping cart of claim 18, wherein the nest space receives at least a portion of a first basket and a second basket of the second nestable shopping cart.
22. (Original) The nestable shopping cart of claim 18, wherein the body and the seat portion define a plurality of substantially solid surfaces and cooperate to substantially enclose the cart passenger seat.
23. (New) The nestable shopping cart of claim 1, further comprising an electronic entertainment device.
24. (New) The nestable shopping cart of claim 1, further comprising a computer game or a video game.
25. (New) The nestable shopping cart of claim 1, further comprising an electronic device including a display and an interactive device.
26. (New) The nestable shopping cart of claim 25, wherein the display comprises a flat screen, a plasma screen, a computer screen, or a television screen.
27. (New) The nestable shopping cart of claim 25, wherein the interactive device comprises a joystick.

28. (New) The nestable shopping cart of claim 10, wherein the body further comprises an electronic device including:

- (a) an audio device;
- (b) a video display coupled to a video cassette recorder or a digital videodisk player;
- (c) a video display device coupled to an audio/video receiver;
- (d) an audio/video storage device coupled to an audio/video playback device; or
- (e) any combination thereof.

29. (New) The nestable shopping cart of claim 28, wherein the audio device comprises a radio receiver, satellite radio receiver, internal broadcasting system, or any combination thereof.

30. (New) The nestable shopping cart of claim 28, wherein the audio device comprises a radio receiver tuned to a pre-determined frequency.

31. (New) The nestable shopping cart of claim 18, further comprising:
a panel mounted between the body and the second basket; and
an electronic device positioned along the panel.

32. (New) The nestable shopping cart of claim 31, wherein the electronic device comprises:

- (a) an audio device;
- (b) a video display device coupled to a video cassette recorder or a digital videodisk player;
- (c) a video display device coupled to an audio/video receiver;
- (d) an audio/video storage device coupled to an audio/video playback device; or
- (e) any combination thereof.
